

Job Title Quality Assurance Engineer

Location Seattle, WA

Summary We're seeking individuals who are passionate about creating an incredible social experience for churches, seeking a career based on continual learning and self-improvement, and interested in working on applications that impact millions of users.

The City is hiring a Quality Assurance Engineer to join the Seattle-based development team. We are looking for an experienced software tester with a strong technical background and a customer-focused zeal for delivering delightful software experiences.

Core Responsibilities

- Execute a comprehensive QA strategy using industry standard best practices with innovative tools and disciplines.
- Verify correctness of weekly deployments using both manual and automated testing techniques.
- Increasing our overall automated test coverage.
- Investigate technical support tickets to write actionable bug reports.

Required Skills

- 3+ years industry experience.
- Strong scripting/coding skills in Ruby, Javascript, C#, or similar language.
- Experience in testing web based applications.
- Ability to understand and translate business requirements and user stories into test cases.

Desired Skills

- Experience with SQL databases (MySQL preferred).
- Experience using The City is a plus.

Application To apply, please send a cover letter and resumé to resumes@onthecity.org.
